

If you have a Chromebook, follow these instructions:

- Log into the Chromebook and start Google Chrome
- Log into Canvas and navigate to the exam that requires LockDown Browser
- Select the link for downloading and installing LockDown Browser
- From the Chrome web store, select "Add to Chrome" to install the LockDown Browser Extension
- Once the extension is installed, some students have found it best to close Chrome, and then log back into Canvas again to start the test.

If you need further assistance, please contact:
