SCC WiFi Guide for Guests

Purpose & Requirements

SCC has rolled out a new WiFi to around campus. Connecting is easier than ever. All SCC guests who want to connect a device to the new WiFi will use the simplified process below.

Choose the "Maricopa" WiFi network. Most devices will launch the page below in their Web Browser. If not, use the Internet app that came with your device. Try connecting to a Site that does not have security (https:) such as cnn.com. When the "Sign In" page loads, tap "Sign In" and your device will connect and load the SCC Home Page.

The device should be now be connected to the Maricopa WiFi and have internet access.
